Toilet Partition Privacy Covers

"Privacy Cover"  patent pending

**Features:**
- Eliminates most door and panel gaps.
- Assures personal privacy.
- Self-adhesive for fastener free installation.
- Clear rigid vinyl blends to all partition colors and materials.
- Cut to fit for various partition door installations.
- Flexible vinyl flap adapts to multiple applications. The smoke/opaque color and serrated surface obscures vision.

**Contents:**
- 2) 58" pieces per set (poly bagged) / 5 sets per carton

**Tools Required:**
- Pencil; Measuring tape; Isopropyl rubbing Alcohol; Multi-purpose Snips and Diagonal pliers

**Easy Installation:**
- For door gap applications (apply to post ONLY)

**A) Latch Side:**
Measure from top of door to top of strike / keeper, then measure from bottom of strike / keeper to bottom of door.
Pre-Cut the “Privacy Cover” with either (Multi-Purpose Snips, Diagonal Pliers or other safe cutting device) to the above measurements and align the cover to the post. Clean up the rough edges with a utility knife or fine grade sandpaper if necessary. Always place the cover on the side opposite to the direction of the door opening.
Clean surface of post, where the “Privacy Cover” is to be mounted, with (isopropyl) rubbing alcohol. Do Not Use Household Cleaners.
Remove adhesive backing from flat surface of the cover. Use Locator Tab to assist in placement. Press firmly to the post and apply pressure, using an up and down motion to set the adhesive. Toilet partition doors may be hinged with different style hinges, installation will vary slightly, but cover will always be placed on the post side opposite to the direction of door opening.

**B) Hinge Side:**
- **Pivot Hinge:**
Measure from top of door to top of top hinge, and then measure from bottom of the top hinge to top of bottom hinge. Usually it will not be necessary to place “Privacy Cover” below the bottom hinge.

- **Surface Hinge:**
Measure door from top to the bottom. Hold “Privacy Cover” to post and determine if adhesive surface will make contact with the hinge fastener heads. If this condition exists, merely cut out a wedge of material at the point of contact with the fastener heads to allow the cover to make an unhindered flat contact to the post.

**NOTE:** Use the same cutting, prepping and application directions as indicated under “Latch Side”.

**Materials — Five are available**

**POWDER COATED STEEL**
The industry standard. Most economical hybrid epoxy/polyester powder coated finish over galvanized steel with honeycomb core.

**PLASTIC LAMINATE**
Aesthetic appeal and economy. Pressure laminate smooth surface, resistant to grease and stains.

**SOLID PLASTIC**
The choice for busy public facilities, high density polyethylene (HDPE) polymer is highly resistant to stains, common acids and cleaning agents, as well as moisture, steam, and corrosion. Will not easily dent or chip.

**STAINLESS STEEL**
Gleaming beauty provides exceptional durability and modern styling. Available in #4 satin or textured finish.

**PHENOLIC - BLACK CORE**
Impact, moisture, and corrosion resistant, the surfaces are smooth and easy to clean. Ideal for extreme moisture conditions in showers, pools, and saunas, or when maintenance includes hosing down washrooms.

**Styless — Four are available**

**OVERHEAD BRACED/FLOOR ANCHORED**
Units are recommended for heavy traffic and necessary vandalism-proof areas. Most economical. Anodized aluminum goes around top. They do not require any special floor construction, therefore they can be used in old or new buildings.

**FLOOR MOUNTED**
Absence of top structure prompts the use of these units in low ceiling areas. Gives modern, contemporary appearance. They require a 3” minimum concrete floor construction to secure anchor bolts.

**CEILING HUNG**
Ceiling Hung is the best choice where minimizing maintenance is of primary importance. They provide a floor area free from obstruction to speed maintenance. However this design requires structural steel supports in the ceiling.

**FLOOR-TO-CEILING ANCHORED**
Better than overhead braced for heavy traffic and vandalism-proof areas. Most stable as pilasters are anchored into concrete floor and structural ceiling support.

**Layout — Examples**

**In-a-Corner**

**Between 2 Walls**

**Free Standing**

**Alcove**

**61” MINIMUM FOR ADA**
**Powder Coated Steel Partitions**

**Complete Restroom Stalls**

- Very economical and often used.
- Finish is a hard hybrid epoxy/polyester powder coated finish over rust resistant phosphate treated steel. With inner honeycomb core bonded to the steel with a non-toxic adhesive to ensure solid construction and sound attenuation. Assembled with a continuous roll-formed interlocking crown molding, with corners brazed and ground smooth.
- Doors, panels and urinal screens — 1” thick, 22 gauge steel. Doors and panels are 58” high.
- Pilasters — 1-1/4” thick, 20 gauge steel.
- Hardware — Cam action hinge permits door to remain at desired position when not in use. Hinges, strike and keeper, coat hook, latch, and bracket are chrome plated alloy. Concealed latch assembly allows for emergency access. Pilaster shoes are 304 stainless steel.
- Installation instructions, all mounting hardware and a can of touch up paint are supplied with each order.

**Privacy/Urinal Screens**

- The overall width of the screen is 2” wider than the width of the panel.

**WALL HUNG**

1” thick by 42” high panel. Available in the following widths - 12, 18, 24 and 30”. Specify — color and Part No. 9SWHS-XX (where XX is the screen width).
